

Mojo for Higher Education

The Campus of Tomorrow Needs Cloud Managed WiFi Today

Where is WiFi Needed in Higher Education Today?

Dormitories

- High performance access for both educational and personal use
- Student-owned devices (laptops, smart devices, gaming systems, IoT, etc)

Classrooms

- Unified networks distributed across larger campuses or multiple locations
- Secure and controlled access for students, faculty and staff

Student Union

- Guest access for students, alumni and other visitors
- On-demand networks for special events and student gatherings

Library/Lecture Halls

- High density environments designed for prolonged use
- Reliable support for hundreds of simultaneous users

How Mojo Helps You

Mojo Networks delivers the only fully-integrated platform to support your wireless infrastructure.

Access

- Simplify your day with automated activities like policy propagation, reporting and system updates
- Make changes and check your network's health from any device
- Easily support bandwidth-intensive applications for every device

Security

- Classification and prevention built on behavior improves accuracy and speed of response
- Detection and prevention occurs 24x7x365 in every WiFi scenario
- Control access through 802.1x and dynamic VLAN support

Engagement

- Custom splash pages use images, text and dynamic content to help promote school identity
- Flexible communication mediums including WiFi, MMS, social media and more
- Create a unified guest experience or tailor it per campus

Demo
