

# End of Life Announcement for the C-60 and C-55 Access Point

## Overview

Mojo Networks is announcing the End of Life for the Mojo C-60 and C-55 access points. In accordance with this announcement, Mojo Networks will no longer accept purchase orders for the C-60 access point after October 31<sup>st</sup>, 2016 and for the C-55 access point after April 30<sup>th</sup>, 2017.

For existing customers, support for the C-60 and the C-55 access point will continue until five years after the End of Life announcement, which occurs on October 31<sup>st</sup>, 2016.

## Key Dates

Product	End of Life	End of Sale	End of Support
C-60	October 31 <sup>st</sup> , 2016	October 31 <sup>st</sup> , 2016	October 31 <sup>st</sup> , 2021
C-55	October 31 <sup>st</sup> , 2016	April 30 <sup>th</sup> , 2017	October 31 <sup>st</sup> , 2021

## End of Sale Part Numbers and Replacement for the C-60 and C-55

The C-60 is a 3x3:3 dual radio, dual band "band-unlocked" 802.11n access point, and can operate as an access point (with background scanning), as a dedicated sensor or have one radio dedicated as a sensor to scan both the 2.4GHz and 5GHz bands while the second serves clients. The replacement product for the C-60 for WiFi access is the Mojo C-130. The C-130 is a tri-radio 802.11ac Wave 2 access point featuring two 4x4:4 access radios and a third 2x2:2 multi-function scanning radio.

WIPS-only customers can look to the Mojo C-75 as a functional replacement for the C-60. The C-75 is a 3x3:3 dual band 802.11ac Wave 1 access point that can operate as an access point (with background scanning) or as a dedicated sensor; the C-75 is on the DISA APL for Federal agencies and third party organizations that fall under its purview.

The C-55 is a 2x2:2 dual radio, dual band 802.11n access point that can operate as an access point (with background scanning) or as a dedicated sensor. The replacement product for the C-55 is the Mojo C-65. The C-65 is a 2x2:2 dual band 802.11ac Wave 1 access point that can operate as an access point (with background scanning) or as a dedicated sensor.

End of Sale Part Number	Replacement Product
C-60	C-130, C-75
C-55	Any 802.11ac platform

Existing customers please contact [support@mojonetworks.com](mailto:support@mojonetworks.com) for any queries.

# Mojo Networks End of Life (EOL) Definitions

Whenever necessary, Mojo Networks will issue an 'End of Life' announcement concerning one or multiple products within its current portfolio. The following definitions come into effect beginning on the date of the announcement.

**End of Sale:** 6 months after End of Life Announcement

**End of Feature Development:** 18 months after End of Life Announcement

- No new features will be added to the platform after this date.
- Mojo Networks will support these platforms and bug fixes will continue until the End-Of-Support date.

**End of Support:** 60 months after End of Life Announcement

- No support will be provided on these platforms after this date; customers can continue to use it on a 'as is' basis.
- For customers who purchased the product with our 'full opex' price option, Mojo Networks will replace these models in the event of catastrophic failures. Contact Mojo Support for more information at [support@mojonetworks.com](mailto:support@mojonetworks.com)
- For customers who purchased the product with our 'capex + opex' option; Mojo Networks will provide a discounted replacement offer 6 months prior to 'End of Support' date. Contact Sales for more information at [sales@mojonetworks.com](mailto:sales@mojonetworks.com)

\* Mojo Networks may make exceptions to the End of Life dates on a per product basis.
